Semi-Annual INDEX of Refining Technology Articles

JULY—DECEMBER, 1945

Subject Index

Subject	Article	Issue	Page
Accidents			
	Stop Accidents in Small Plants, Too	July 4	R- 523
Acetylene			
	Acetylene Production by Electric Arc Cracking, and Its Purification	Nov. 7	R- 866
	Arc Cracking of Gases Yields Acetylene for Butadiene in Huls Rubber Plant	Nov. 7	R- 865
	Chemistry of Acetylene, The (BR)	July 4	R- 522
	Vinyl Acetylene (PT)	Dec. 5	R- 988
Acrylonitrile			
	Acrylonitrile (KU)	July 4	R- 559
Additives			
	Detergent Oils (IL)	Nov. 7	R- 884
	Foaming of Lubricating Oils (PT)	July 4	R- 504
	Lube Oil Additives (PT)	Nov. 7	R- 909
	Neutralization Number Test for Additive Oils is Subject to Misinterpretation	Nov. 7	R- 885
	New Maximum Pour Point Test Method Covers Lube Oils with Depressants Added	Aug. 1	R- 668
	Pour Inhibitors and Thickeners (PT)	Sept. 5	R- 694
	Sulfonic Derivatives as Lubricating Additives	Oct. 3	R- 793
	Sulfur and Sulfur Chloride Organic Reaction Products as "Lube" Oil Additives	Nov. 7	R- 871
	Use of Phosphorus Sulfide Organic Reaction Products as "Lube" Oil Additives	Dec. 5	R-1001
Alcohol			
	Alcohol (KU)	Dec. 5	R-1000
	"O.X.O." Process Made Higher Alcohols from Fischer-Tropsch Olefins	Nov. 7	R- 926
Alkylation			
	Butane Drier in Alkylation Plant Saves 5 Tons of Catalyst a Day	Nov. 7	R- 869
	Feed Preparation Unit Boosts Production of Alkylation Plant, Ups 100-Octane Output	Aug. 1	R- 596
Analysis (see also **Tests**)			
	Analysis of Light Constituents in Crude Petroleum by Low-Temperature Fractional Distillation	Sept. 5	R- 705
	Evaluation of Lubricating Oil Crudes	Oct. 3	R- 765
	Methods for Identification of Hydrocarbons Described (BR)	Oct. 3	R- 845
	Theory and Application of Infrared Spectroscopy (BR)	Sept. 5	R- 745
Antifreeze			
	Non-Foaming Antifreeze Solutions (PT)	Nov. 7	R- 909
Anti-Knock (see **Engine Knock**)			
Arc Cracking			
	Acetylene Production by Electric Arc Cracking, and Its Purification	Nov. 7	R- 866
	Arc Cracking of Gases Yields Acetylene for Butadiene in Huls Rubber Plant	Nov. 7	R- 865
Atomic Developments			
	Atomic Energy (KU)	Oct. 3	R- 816
	Atomic Sidelights (KU)	Dec. 5	R-1000
	Improved Operating Techniques in Refining Will Accrue from Atomic Bomb Research	Oct. 3	R- 836
Automotive Developments			
	Automobile Developments (KU)	Sept. 5	R- 744
	Automobiles (KU)	Dec. 5	R- 998
	Bearing Development up to Date	Sept. 5	R- 718
Aviation Gasoline			
	Codimer Was Vital Contribution to the Early "Avgas" Program (Ed)	Nov. 7	R- 936
	Germans Made High Aromatic Aviation Gasoline by Coal Hydrogenation	Nov. 7	R- 851
Azeotropic Distillation (see **Fractionation**)			
Bearings			
	Bearing Developments Up to Date	Sept. 5	R- 718
	Bearing Lubrication (IL)	July 4	R- 556
	Bearing Lubrication (Cont.) (IL)	Aug. 1	R- 608
	Lubrication of Ball and Roller Bearings (IL)	Sept. 5	R- 704
Blending			
	Chemical Composition and Road Anti-knock Performance of Postwar Motor Fuels	Oct. 3	R- 777
	Ethyl Fluid Continuously Blended into Gasoline in Product Pipeline	Aug. 1	R- 598
Bubble Caps and Trays			
	New Design of Downspout for Bubble Trays Separates Liquid from Foam and Vapors	Dec. 5	R- 990
Butadiene			
	Acetylene Production by Electric Arc Cracking, and Its Purification	Nov. 7	R- 866
	Arc Cracking of Gases Yields Acetylene for Butadiene in Huls Rubber Plant	Nov. 7	R- 865
Butane Drier			
	Butane Drier in Alkylation Plant Saves 5 Tons of Catalyst a Day	Nov. 7	R- 869
Butyl Rubber (see **Synthetic Rubber**)			
Byproducts			
	Russians Recover 90-95% of Sulfuric Acid from Sludge, Obtain Valuable Byproducts	Sept. 5	R- 688
Capacities (see **Plant Capacities**)			
Carbon Black			
	Carbon Black (KU)	Oct. 3	R- 820
Carbon Formation			
	The Formation of Carbon in Catalytic Cracking	Sept. 5	R- 697
Cast Iron			
	Use of Cast Iron in Chemical and Process Industries	Oct. 3	R- 806
Catalysis			
	Bead Catalysts (PT)	Dec. 5	R- 986
	Chemicals from Petroleum (PT)	Aug. 1	R- 595
	Manufacture, Regeneration of Fischer-Tropsch Catalyst	Nov. 7	R- 922
Catalytic Cracking (see **Cracking, Catalytic**)			
Chemicals from Petroleum (see **Petrochemicals**)			
Coal, Oil from (see **Synthetic Fuels and Lubricants**)			
Codimer			
	Codimer Was Vital Contribution to the Early "Avgas" Program (Ed)	Nov. 7	R- 936
	Reconversion of Codimer Units to Peacetime Operation Will Not Be Difficult, Mid-Continent Refiners Claim	Aug. 1	R- 671
Companies (see also **Plants Described**)			
	Cities Service Oil Co. (A Workable Employe Suggestions Plan)	July 4	R- 507
	East Ohio Gas Co. (Scientists Complete Study of Failure of East Ohio Gas Co.'s Liquid Storage Plant)	Sept. 5	R- 679
	Humble Oil & Refining Co. (Humble's "Coin-Your-Ideas" Plan Has Rewarded Over 2000 Workers)	Aug. 1	R- 626
	Pure Oil Co. (Testing Cutting Oils)	Aug. 1	R- 614
	Shell Oil Company, Wood River Products Pipeline Pump Station (Ethyl Fluid Continuously Blended into Gasoline in Product Pipeline)	Aug. 1	R- 598
	Standard Oil Co. of New Jersey (Pierced Plate Contacting Towers Used for Treating with Chemical Solutions)	July 4	R- 529

(CODE, for regular features: BR—book review; Ed—editorial; IL—"Industrial Lubrication"; KU—"Keeping Up With the News"; PT—"Patent Trends")

Subject	Article	Issue	Page
Companies (con't.)			
	Sun Oil Co. (The Use of Gas Turbines in Sun Oil Refineries)	Aug. 1	R- 635
	The Texas Company at Los Angeles (Feed Preparation Unit Boosts Production of Alkylation Plant, Ups 100-Octane Output)	Aug. 1	R- 596
	Tide Water Associated Oil Co., Avon, Cal. (24-Ft. Diameter Vacuum Tower Distills Heavy Gas Oil for "Cat Cracker")	Aug. 1	R- 623
Construction			
	Refiners Crowd Plant Capacities Rather Than Overbuild in War	Sept. 5	Cover
Coordinating Research Council			
	Coordinating Research Council, The	Dec. 5	R- 958
Corrosion			
	Corrosion (PT)	Nov. 7	R- 909
	Corrosion Preventives	Aug. 1	R- 609
	Corrosion Protection of Steel Pipe by Resin Lining Coatings	Dec. 5	R- 992
	Use of Cast Iron in Chemical and Process Industries	Oct. 3	R- 806
Cracking, Catalytic			
	Formation of Carbon in Catalytic Cracking, The	Sept. 5	R- 697
	High-Capacity Operations on Fluid Cracking Units	Dec. 5	R- 972
	Liquid-Charge Technique in TCC Processing	Dec. 5	R- 977
	New 1000 b/d Catalytic Cracker Operates on Fluid Principle	Dec. 5	R- 939
	Peace-Time Fuel Oils from War Equipment	Dec. 5	R- 961
	Small-Scale Catalytic Cracking	Oct. 3	R- 767
	Upping Octane Within Cost Limits Poses $64 Question for Refiners	Dec. 5	R- 942
Cracking, Thermal			
	First 3-Coil Thermal Cracking Unit in U. S. Goes on Stream at Sunray Refinery	Sept. 5	R- 675
	Thermal Cracking (KU)	July 4	R- 560
	Vapor Phase Oxidizing Cracking of Oil Products:		
	First Installment	Nov. 7	R- 912
	Second Installment	Dec. 5	R-1014
Cutting Oils			
	Testing Cutting Oils	Aug. 1	R- 614
Cycling Operations			
	Unitized Cycling Operations at Haynesville Increase Ultimate Recovery 8 Million Bbls.	Aug. 1	R- 641
Dehydrating			
	Butane Drier in Alkylation Plant Saves 5 Tons of Catalyst a Day	Nov. 7	R- 869
Design (see **Plant Design**)			
Detergent Oils			
	Detergent Oils (IL)	Nov. 7	R- 884
Diesel Engines			
	Project for Technology Seen in the Diesel Fuels Field (Ed)	July 4	R- 576
Diesel Fuel			
	Diesel Oils (KU)	Oct. 3	R- 818
	Project for Technology Seen in the Diesel Fuels Field (Ed)	July 4	R- 576
Distillation (see **Fractionation**)			
Economics			
	Small-Scale Catalytic Cracking	Oct. 3	R- 767
Employee Suggestions (see **Suggestion Systems**)			
Engine Knock			
	Chemical Composition and Road Antiknock Performance of Postwar Motor Fuels	Oct. 3	R- 777
	Slow-Motion Pictures Throw New Light on the Cause of Knock in Fuel Combustion	Oct. 3	R- 773
Engine Lubrication			
	Charts Show Viscosity and Oxidation Changes in Used Crankcase Oils	Nov. 7	R- 891
	Lubrication of Internal Combustion Engines (IL)	Oct. 3	R- 792
Equipment			
	Effect of Supercompressibility of Natural Gas on Compressor Performance	July 4	R- 544
	Feed Preparation Unit Boosts Production of Alkylation Plant, Ups 100-Octane Output	Aug. 1	R- 596
	Improved Operating Techniques in Refining Will Accrue from Atomic Bomb Research	Oct. 3	R- 836
	Inside Germany's Wartime Oil Plants	Dec. 5	R- 950
	New Design of Downspout for Bubble Trays Separates Liquid from Foam and Vapors	Dec. 5	R- 990
	No Peace for Fractionators	Dec. 5	R- 965
	P.A.W. Refinery Inspection Manual:		
	Part 1—Process Equipment	July 4	R- 500
	Part 1—Process Equipment (con't.)	Aug. 1	R- 582
	Part 1—Process Equipment (con't.)	Sept. 5	R- 689
	Part 1—Process Equipment (conc.)	Oct. 3	R- 821
	Part 2—Electrical Equipment	Nov. 7	R- 897
	Pierced Plate Contacting Towers Used For Treating with Chemical Solutions	July 4	R- 529
	24-Ft. Diameter Vacuum Tower Distills Heavy Gas Oil for "Cat Cracker"	Aug. 1	R- 623
	Use of Cast Iron in Chemical and Process Industries	Oct. 3	R- 806
Extractive Distillation (see **Fractionation**)			
Federal Research (see **Research**)			
Feed Preparation			
	Butane Drier in Alkylation Plant Saves 5 Tons of Catalyst a Day	Nov. 7	R- 869
	Feed Preparation Unit Boosts Production of Alkylation Plant, Ups 100-Octane Output	Aug. 1	R- 596
	24-Ft. Diameter Vacuum Tower Distills Heavy Gas Oil for "Cat Cracker"	Aug. 1	R- 623
Fires			
	New Methods of Fighting Oil Fires are Given Full-Scale Tests in 93-Ft. Tank	July 4	R- 505
	Scientists Complete Study of Failure of East Ohio Gas Co.'s Storage Plant	Sept. 5	R- 679
Fischer-Tropsch Process			
	Fischer-Tropsch and Hydrogenation Plants in Ruhr Valley Studied by Joint Mission	Nov. 7	R- 861
	Fischer-Tropsch Plants Gave Nazis Diesel, Motor Fuels, Lubricants	Nov. 7	R- 924
	Lignite (KU)	Nov. 7	R- 935
	Manufacture, Regeneration of Fischer-Tropsch Catalyst	Nov. 7	R- 922
	New Version of Fischer-Tropsch Reaction Gives 90% Yield of Iso-Paraffins	Dec. 5	R- 955
	"O.X.O" Process Made Higher Alcohols from Fischer-Tropsch Olefins	Nov. 7	R- 926
	Synthetic Lubricants Made at Two Plants in France	Nov. 7	R- 859
Fluid Catalyst Technique			
	Chemicals from Petroleum (PT)	Aug. 1	R- 595
Fluid Catalytic Cracking Process			
	High-Capacity Operations on Fluid Cracking Units	Dec. 5	R- 972
	New 1000 b/d Catalytic Cracker Operates on Fluid Principle	Dec. 5	R- 939
Foaming			
	Foaming of Lubricating Oils (PT)	July 4	R- 504
Foreign Developments, German			
	Acetylene Production by Electric Arc Cracking, and its Purification	Nov. 7	R- 866
	Arc Cracking of Gases Yields Acetylene for Butadiene in Huls Rubber Plant	Nov. 7	R- 865
	First Listing of Official Reports by Technical Missions on Refineries and Synthetic Oil Plants in Germany	Nov. 7	R- 930

(CODE, for regular features: BR—book review; Ed—editorial; IL—"Industrial Lubrication"; KU—"Keeping Up With the News"; PT—"Patent Trends")

Subject	Article	Issue	Page
Foreign Developments, German (con't.)			
	Fischer-Tropsch and Hydrogenation Plants in Ruhr Valley Studied by Joint Mission	Nov. 7	R- 861
	Fischer-Tropsch Plants Gave Nazis Diesel, Motor Fuels, Lubricants	Nov. 7	R- 924
	Four Underground Lubricating Oil Plants Were Being Constructed by the Germans	Nov. 7	R- 858
	Germans Made High Aromatic Aviation Gasoline by Coal Hydrogenation	Nov. 7	R- 851
	German Technology (KU)	Aug. 1	R- 658
	Germany's "Dispersed" Refineries (map)	Nov. 7	R- 856
	Germany's Progress in Straight Refining is Reported Inferior to U. S. Advances	Oct. 3	R- 763
	Inside Germany's Wartime Oil Plants	Dec. 5	R- 950
	Manufacture, Regeneration of Fischer-Tropsch Catalyst	Nov. 7	R- 922
	New Version of Fischer-Tropsch Reaction Gives 90% Yield of Iso-Paraffins	Dec. 5	R- 955
	Our "Spoils" of War with Germany is the Know-How of Their Processes (Ed)	Nov. 7	R- 936
	"O.X.O." Process Made Higher Alcohols from Fischer-Tropsch Olefins	Nov. 7	R- 926
	Synthetic Lubricants Made at Two Plants in France	Nov. 7	R- 859
	With the Technical Oil Mission in Germany	Dec. 5	R- 954
Foreign Developments, Russian			
	Russians Recover 90-95% of Sulfuric Acid from Sludge, Obtain Valuable Byproducts	Sept. 5	R- 688
	Survey of Russian Literature on Rubber from Alcohol (BR)	Sept. 5	R- 745
	Synthesis of Acetone from Acetylene	Aug. 1	R- 631
	Vapor Phase Oxidizing Cracking of Oil Products:		
	First Installment	Nov. 7	R- 912
	Second Installment	Dec. 5	R-1014
Foreign Refineries			
	New 50,000 Bbl. Saudi Arabia Refinery Ready to Go On Stream	Aug. 1	R- 661
Formaldehyde			
	Formaldehyde (BR)	July 4	R- 522
Fractionation			
	Developments in Azeotropic and Extractive Distillation Reviewed in Symposium	July 4	R- 541
	Extractive and Azeotropic Distillation, 1—Theoretical Aspects	Sept. 5	R- 729
	New Design of Downspout for Bubble Trays Separates Liquid from Foam and Vapors	Dec. 5	R- 990
	No Peace for Fractionators	Dec. 5	R- 965
	24-Ft. Diameter Vacuum Tower Distills Heavy Gas Oil for "Cat Cracker"	Aug. 1	R- 623
	Vapor Phase Extraction (PT)	July 4	R- 504
Fuel Combustion in Engines			
	Slow-Motion Pictures Throw New Light on the Cause of Knock in Fuel Combustion	Oct. 3	R- 773
Fuel Oils			
	Peace-Time Fuel Oils from War Equipment	Dec. 5	R- 961
Fuels (see also **Synthetic Fuels and Lubricants**, and specific fuels)			
	Chemical Composition and Road Antiknock Performance of Postwar Motor Fuels	Oct. 3	R- 777
	Jet Propulsion Fuels (KU)	July 4	R- 558
	Upping Octane Within Cost Limits Poses $64 Question for Refiners	Dec. 5	R- 942
Gasoline, Aviation (see **Aviation Gasoline**)			
Gas Turbines (see also **Jet Propulsion**)			
	Aviation Gas Turbine (KU)	Aug. 1	R- 654
	Marine Gas Turbines (KU)	Sept. 5	R- 744
	The Use of Gas Turbines in Sun Oil Refineries	Aug. 1	R- 635
Germany (see **Foreign Developments**)			
Greases			
	Lubrication of Ball and Roller Bearings (IL)	Sept. 5	R- 704
High Speed Photography			
	Slow-Motion Pictures Throw New Light on the Cause of Knock in Fuel Comaromatics (PT)	Oct. 3	R- 773
Hydrogenation			
	Fischer-Tropsch and Hydrogenation Plants in Ruhr Valley Studied by Joint Mission	Nov. 7	R- 861
	Germans Made High Aromatic Aviation Gasoline by Coal Hydrogenation	Nov. 7	R- 851
	Petroleum Hydrogenation (KU)	Sept. 5	R- 742
	Synthetic Liquid Fuels Program	Sept. 5	R- 709
Inspection			
	P.A.W. Refinery Inspection Manual:		
	Part 1—Process Equipment	July 4	R- 500
	Part 1—Process Equipment (con't.)	Aug. 1	R- 582
	Part 1—Process Equipment (con't.)	Sept. 5	R- 689
	Part 1—Process Equipment (conc.)	Oct. 3	R- 821
	Part 2—Electrical Equipment	Nov. 7	R- 897
	Recommended Refinery Inspection Procedure is Prepared by P.A.W.	July 4	R- 499
Isomerization			
	Isomerization of Naphthenes to Hydroaromatics (PT)	Nov. 7	R- 909
Iso-Paraffins			
	New Version of Fischer-Tropsch Reaction Gives 90% Yield of Iso-Paraffins	Dec. 5	R- 955
Jet Propulsion (See also **Gas Turbines**)			
	Jet Propulsion Fuels (KU)	July 4	R- 558
Knock (see **Engine Knock**)			
Laboratories			
	My Trip to the "Lab"	Sept. 5	R- 708
Lignite			
	Lignite (KU)	Nov. 7	R- 935
Lubricants (see also **Synthetic Lubricants**)			
	Bearing Lubrication (IL)	July 4	R- 556
	Bearing Lubrication (cont.) (IL)	Aug. 1	R- 608
	Detergent Oils (IL)	Nov. 7	R- 884
	Evaluation of Lubricating Oil Crudes	Oct. 3	R- 765
	Foaming of Lubricating Oils (PT)	July 4	R- 504
	Four Underground Lubricating Oil Plants Were Being Constructed by the Germans	Nov. 7	R- 858
	Lubrication of Ball and Roller Bearings (IL)	Sept. 5	R- 704
	Lubrication of Internal Combustion Engines (IL)	Oct. 3	R- 792
	New Maximum Pour Point Test Method Covers Lube Oils with Depressants Added	Aug. 1	R- 668
	Sulfonic Derivatives as Lubricating Additives	Oct. 3	R- 793
	Sulfur and Sulfur Chloride Organic Reaction Products as "Lube" Oil Additives	Nov. 7	R- 871
	Tests and Specifications (IL)	Dec. 5	R-1012
	Use of Phosphorus Sulfide Organic Reaction Products as "Lube" Oil Additives	Dec. 5	R-1001
Lubrication (see **Engine Lubrication** and **Lubricants**)			
Maintenance			
	Arc Welding Permits Field Repairs on Corroded Pressure Vessel	Dec. 5	R- 995
	Army's "Welder-Jeep" May Assist in Refinery Maintenance	July 4	R- 555
	Corrosion Protection of Steel Pipe by Resin Baking Coatings	Dec. 5	R- 992
	Maintenance of Products Pipelines	July 4	R- 561
	New Chrome Plating Method Boosts Life of Engine Parts	Sept. 5	R- 684
Mechanical Foam			
	New Methods of Fighting Oil Fires Are Given Full-Scale Tests in 93-Ft. Tank	July 4	R- 505

(CODE, for regular features: BR—book review; Ed—editorial; IL—"Industrial Lubrication"; KU—"Keeping Up With the News"; PT—"Patent Trends")

Subject	Article	Issue	Page
Natural Gas			
	Effect of Supercompressibility of Natural Gas on Compressor Performance	July 4	R- 544
Neutralization Number			
	Neutralization Number Test for Additive Oils is Subject to Misinterpretation	Nov. 7	R- 885
Oxidation of Hydrocarbons			
	Catalytic Oxidation of Hydrocarbons (PT)	Sept. 5	R- 694
"O.X.O." Process			
	"O.X.O." Process Made Higher Alcohols from Fischer-Tropsch Olefins	Nov. 7	R- 926
Patents			
	Patent System "Reforms" Have No Part in the Government's Research Program (Ed)	Oct. 3	R- 848
	Patent Trends in Petroleum Refining	July 4	R- 504
	Patent Trends in Petroleum Refining	Aug. 1	R- 595
	Patent Trends in Petroleum Refining	Sept. 5	R- 694
	Patent Trends in Petroleum Refining	Oct. 3	R- 833
	Patent Trends in Petroleum Refining	Nov. 7	R- 909
	Patent Trends in Petroleum Refining	Dec. 5	R- 986
	Whither Industrial Research?	Oct. 3	R- 802
Petrochemicals			
	Acrolein Compounds (PT)	Dec. 5	R- 988
	Acrylonitrile (KU)	July 4	R- 559
	Carbide and Carbon (KU)	Nov. 7	R- 933
	Cellulose Propionate (KU)	Dec. 5	R- 997
	Chemicals from Petroleum (PT)	Aug. 1	R- 595
	Corrosion Preventives	Aug. 1	R- 609
	Diolefins (PT)	Oct. 3	R- 833
	Direct Amination of Olefins (PT)	Oct. 3	R- 833
	Nitro Hydrocarbons and Derivatives (PT)	Dec. 5	R- 986
	Pest Control (KU)	July 4	R- 558
	Petroleum Chemicals (KU)	Sept. 5	R- 742
	Petroleum Raw Materials (KU)	Aug. 1	R- 656
	Sulfur Containing Polymers (PT)	Sept. 5	R- 694
	Synthesis of Acetone from Acetylene	Aug. 1	R- 631
	Synthetic Organic Chemicals (KU)	Dec. 5	R- 997
	Vinyl Acetylene (PT)	Dec. 5	R- 988
Petroleum Substitutes			
	Petroleum Substitutes (KU)	Sept. 5	R- 744
Physical Properties of Hydrocarbons			
	Determination of Equilibrium Constants for Butanes and Pentanes	July 4	R- 532
Pipelines			
	Ethyl Fluid Continuously Blended into Gasoline in Product Pipeline	Aug. 1	R- 598
	Maintenance of Products Pipelines	July 4	R- 561
Plant Capacities			
	Refiners Crowd Plant Capacities Rather Than Overbuild in War	Sept. 5	Cover
	Small-Scale Catalytic Cracking	Oct. 3	R- 767
Plant Design			
	Effect of Supercompressibility of Natural Gas on Compressor Performance	July 4	R- 544
	Feed Preparation Unit Boosts Production of Alkylation Plant, Ups 100-Octane Output	Aug. 1	R- 596
	Pierced Plate Contacting Towers Used for Treating with Chemical Solutions	July 4	R- 529
	24-Ft. Diameter Vacuum Tower Distills Heavy Gas Oil for "Cat Cracker"	Aug. 1	R- 623
Plants Described			
	Haynesville Cycling Plant (Unitized Cycling Operations at Haynesville Increase Ultimate Recovery 8 Million Bbls.)	Aug. 1	R- 641
	Huls, Germany (Arc Cracking of Gases Yields Acetylene for Butadiene in Huls Rubber Plant)	Nov. 7	R- 865
	Porta, Germany (Four Underground Lubricating Oil Plants were Being Constructed by the Germans)	Nov. 7	R- 858
	Sunray Oil Co.'s Allen, Oklahoma refinery (First 3-Coil Thermal Cracking Unit in U. S. Goes on Stream at Sunray Refinery)	Sept. 5	R- 675
Plating, Chrome			
	New Chrome Plating Method Boosts Life of Engine Parts	Sept. 5	R- 684
Poly Gasoline			
	Reconversion of Codimer Units to Peacetime Operation Will Not Be Difficult, Mid-Continent Refiners Claim	Aug. 1	R- 671
"Porus-Krome"			
	New Chrome Plating Method Boosts Life of Engine Parts	Sept. 5	R- 684
Pour Point			
	New Maximum Pour Point Test Method Covers Lube Oils with Depressants Added	Aug. 1	R- 668
	Ordnance Dept. Issues Stable Pour Point Test	Aug. 1	R- 671
	Pour Inhibitors and Thickeners (PT)	Sept. 5	R- 694
Quenching Oils			
	Quenching Oils (KU)	July 4	R- 559
Reconversion			
	Reconversion of Codimer Units to Peacetime Operation Will Not Be Difficult, Mid-Continent Refiners Claim	Aug. 1	R- 671
Recycling (see **Cycling Operations**)			
Research			
	Congress Asked to Continue Government Control of Research in Peace Times	Aug. 1	R- 579
	Coordinating Research Council, The	Dec. 5	R- 958
	Goal is Support of Research Without Political Influence (Ed)	Aug. 1	R- 672
	Improved Operating Techniques in Refining Will Accrue from Atomic Bomb Research	Oct. 3	R- 836
	Oklahoma School Solicits Oil Research Projects (Ed)	July 4	R- 576
	Slow-Motion Pictures Throw New Light on the Cause of Knock in Fuel Combustion	Oct. 3	R- 773
	Stimulate Industrial Research by Removing Undue Tax Burden (Ed)	Sept. 5	R- 760
	Whither Industrial Research?	Oct. 3	R- 802
Rubber (see **Synthetic Rubber**)			
Russia (see **Foreign Developments**)			
Rust Preventives			
	Corrosion Preventives	Aug. 1	R- 609
	Rust Preventives (PT)	Nov. 7	R- 909
Safety			
	Bulletin on Hydrogen Sulfide Poisoning (BR)	Oct. 3	R- 845
	New Methods of Fighting Oil Fires Are Given Full-Scale Tests in 93-Ft. Tank	July 4	R- 505
	Scientists Complete Study of Failure of East Ohio Gas Co.'s Liquid Storage Plant	Sept. 5	R- 679
	Stop Accidents in Small Plants, Too	July 4	R- 523
Salt Water Disposal			
	University Scientists Study East Texas Oil Field Salt Water Disposal System	Sept. 5	R- 726
Shale, Oil From (see **Synthetic Fuels and Lubricants**)			
Silicones			
	Meet the New Chemical Family—the Silicones	Dec. 5	R- 947
	Polysilicones from Petroleum (PT)	Oct. 3	R- 834
	Silicones as Lubricants	Dec. 5	R- 944
Sludge			
	Russians Recover 90-95% of Sulfuric Acid from Sludge, Obtain Valuable Byproducts	Sept. 5	R- 688
	Sulfonic Derivatives as Lubricating Additives	Oct. 3	R- 793

Here's Your Answer!

TO THE CATALYST QUESTION

HIGH ACTIVITY

+

RUGGED STRUCTURE

+

UNIFORM HIGH QUALITY

ALL ADD UP TO SUPERIOR PERFORMANCE RECORDS BY

AEROCAT*

SYNTHETIC FLUID CRACKING CATALYST

That is why you can count on AEROCAT to place your plans in a leading position for peacetime automotive and aviation fuel production. For AEROCAT, backed by its outstanding wartime record, is ready to help you achieve higher throughput . . . greater yield at uniform high quality. With AEROCAT on the job it will not be necessary to manipulate plant conditions to compensate for variations in catalyst quality.

Supplies of AEROCAT, in both grades F and G, and manufactured according to specifications developed by Universal Oil Products Company, are immediately available for prompt delivery from Cyanamid's plant at Fort Worth, Texas. In addition, new AEROCAT developments are on the way.

Cyanamid's Technical field service representatives are ready... *NOW*...to give you practical assistance to achieve maximum AEROCAT performance results.

**Trade-mark of American Cyanamid & Chemical Corporation denoting cracking catalyst of its manufacture.*

When Performance Counts...Call on Cyanamid

American CYANAMID & Chemical Corporation

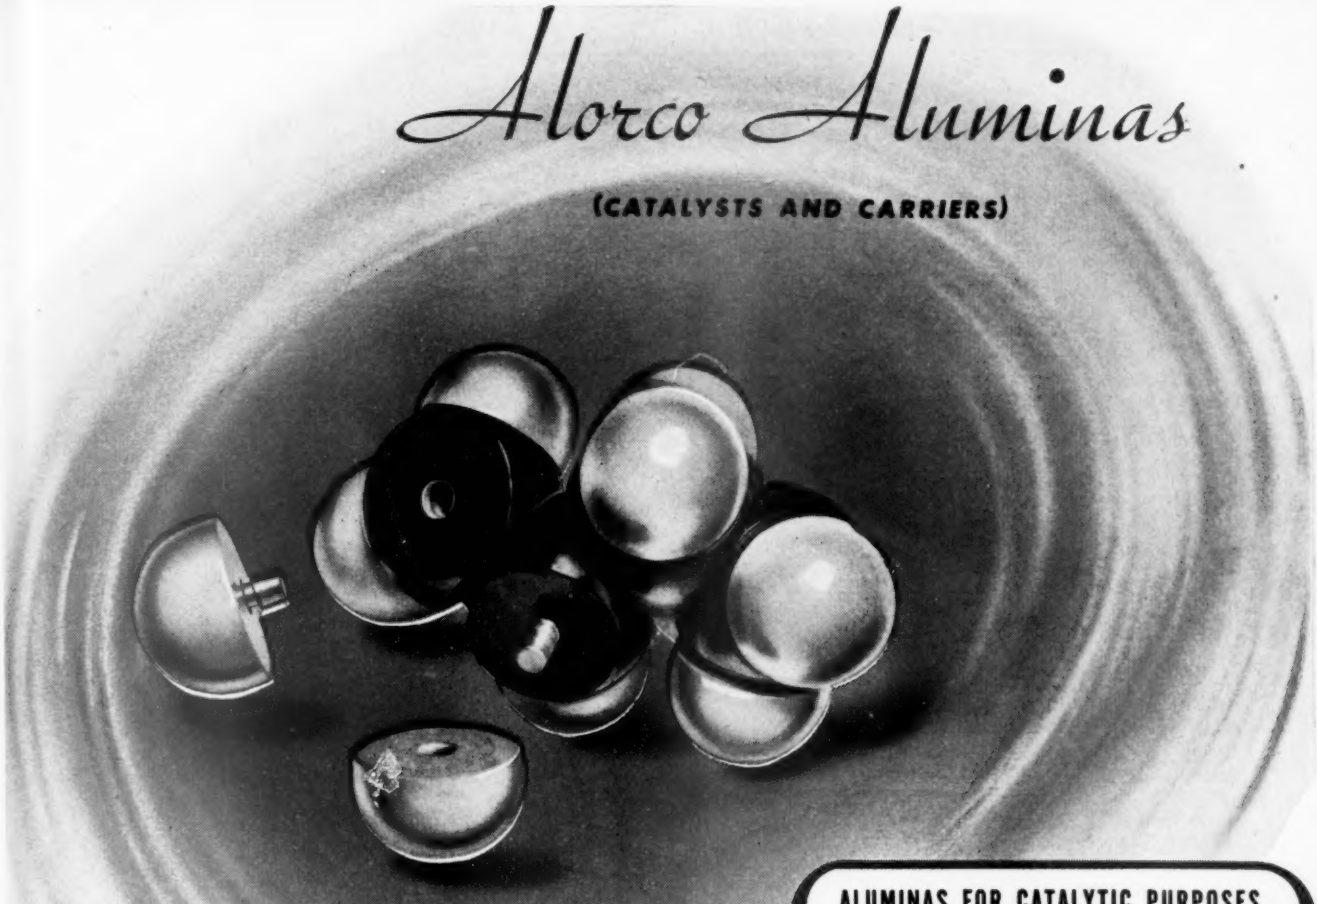
Alorco Aluminas

(CATALYSTS AND CARRIERS)



are easy on the carbon bond...

F-10 Alorco Alumina is high in purity, low in soda content—.1% or less. It is used widely in dehydrogenation work for breaking the carbon-hydrogen bond. Yet, in this reaction, it is easy on the carbon-carbon bond.

Alorco Aluminas, suitable for catalytic work, are available in the forms listed here. You may obtain samples for trial in your own plant; write to Aluminum Ore Company, Subsidiary of ALUMINUM COMPANY OF AMERICA, 2000 Gulf Building, Pittsburgh 19, Pennsylvania.

ALUMINAS FOR CATALYTIC PURPOSES

ACTIVATED ALUMINAS (F SERIES)
These aluminas produced from crystalline aluminum tri-hydrate are catalytically active. Hard granules are available in graded mesh sizes up to one inch. Various grades are distinguished by surface area, porosity and soda contents as low as .1%.

ACTIVATED ALUMINAS (H SERIES)
These aluminas are largely amorphous. They have high surface area and sorptive capacity, high resistance to heat and live steam. Experimental lots are now available in minus-20 mesh particles or as spherical balls ¼" to ½" in diameter.

TABULAR ALUMINAS (T SERIES)
These aluminas are a form of corundum, having high strength and resistance to abrasion. They are unaffected by high temperatures. They are available in graded mesh granules up to 1" and as spherical balls ⅜" to 1" in diameter. Balled forms have porosity of either less than 10% or approximately 30%. Granular forms may have porosities of approximately 40%.

OTHER ALUMINAS
Hydrated Aluminas, C-700 Series, have particles less than .5 micron. They become active after being heated to approximately 300° C. Monohydrated Aluminas, D Series, have particles approximately one micron in diameter. They are substantially inactive catalytically but have considerable porosity.
